

Oil & Gas Producer Regains Focus on Growth Objectives with Easy-to-Deploy Automation

RESULTS

- Improved time management among employees
- Fast setup and accurate detailed production data allowed for greater focus by employees
- Helpful, friendly support that is available 24/7 ensured any questions or issues were quickly resolved
- Cost-effective solution significantly reduced operating expenses

APPLICATION

- Emerson's Zedi Cloud SCADA Platform
- Automation Hardware
- Lifecycle Services

CUSTOMER

Large Producer in the United States

CHALLENGE

Emerson's cloud-based platform and production automation is our focus and why we provide it as a service making it easier to explore automation options for company needs with a secure, flexible cloud platform.

A large North American oil and gas producer was struggling to find the time to plan new drills and get production answers that were needed to react to daily pressures (both internal and external).

The producer needed to automate several sites to provide internal personnel with the information required but didn't want internal resources absorbed in the process to procure, engineer, install or maintain this automation.

“Having Emerson provide a full platform, automation and services allowed for a sharper focus from internal resources on strategizing and achieving large-scale successful growth objectives and full attention targeted on new drill plans.”

Large Producer in the United States
VP of Operations

CHALLENGE *(cont'd.)*

The company was seeking an automation solution for their sites that could be quickly deployed and provide instant access to accurate data for faster decision making, ensuring their staff had more time to focus on core business operations.

The customer called upon Emerson to help get their automation up and running without any headaches — or fiscal surprises.

SOLUTION

Emerson installed automation in the field that provided the accurate data necessary to quickly deliver better business decisions, all backed by expert service from every angle. This turnkey solution, including support, made the entire process easy and fast.

When the customer contacted Emerson to help with providing a solution to their automation problems, we stepped up with best-practice hardware, a secure cloud SCADA platform, and fast installation services to quickly get it into the field and running smoothly. It was merely a matter of putting it all together quickly and accurately. Since our solution is engineered for ease, accuracy, and speed, it didn't require the attention of our customer's internal resources.

The company has been using our Zedi Cloud SCADA Platform with everything running efficiently as anticipated. Our solution has allowed the producer to put greater internal focus on bigger goals such as new drills, forecasting and many other areas of their core business. Doing so has ensured the company is now in a much better position to protect production, profits, and long term sustainability.
